

Ohio Living Memory Care

Transform how we support those living with cognitive challenges to create a greater sense of purpose and meaning

Engaging Environments

creating a customized therapeutic approach that offers hope and enhances resident quality of life, family support, and employee job satisfaction

- Educate, train, and certify memory care staff as Dementia Specialists.
- Establish “I’m Still Here” Certified Centers of Excellence in our Dementia centers focused on treating cognitive impairment through engagement.
- Utilize technology to create customized therapy plans individualized to each person’s interests and abilities including music, video, and stimulating therapy.

Building Community

providing all persons experiencing cognitive challenges with an opportunity to participate and have success in ongoing learning and meaningful experiences resulting in a supportive environment focused on health, dignity, and fulfillment

- Educate, train, and certify all independent living, assisted living, and skilled nursing staff members to serve as Dementia Specialists.
- Establish “Engaged Life Programs” in our Life Plan Communities designed for those experiencing mild cognitive impairment and those interested in maintaining brain vitality.
- Provide education, experiential learning and ongoing support for residents, families, and community members to understand the memory care process and teach them specialized communication skills to enhance interactions with loved ones.

Creating Resources

expanding access to education, resources, and cognitive care technologies to address the growing need for all aging adults in the state of Ohio

- Provide evidence-based education and training for at-home caregivers.
- Implement and adapt techniques and technologies to provide enhanced care to those residing at home.
- Create an inclusive culture of cognitive care where those living with memory impairment and those providing care feel a sense of community and support.
